

### Overview

Keyless convenience in easy to install deadbolt and lever locks. All models have a conventional key cylinder, combined with an electronic keypad that can be programmed with multiple unique codes. The EL700 Series is available in three convenient options: EL730SLR which allows up to ten radio frequency remotes to be programmed; the EL740S deadbolt which can be programmed to unlock with up to ten MiFare Smart Cards, and offers an optional single use code feature; and the EL750LY lever lock which has a conventional key cylinder and an electronic keypad, and can be programmed with up to 100 unique user codes to operate the lock. These locks can be installed in place of most conventional locks with no drilling required.
